

Jewel Madeira Threads 100 meters each spool. Jewel Madeira is a special holographic foil, which will really give your work a SPARKLE! Stitches reflect the lights around them to create a shimmering spectrum of multi-colored thread work. The color reflections are true hologram pinpoints laid in a continuous, random fashion on a micro-thin polyester film. Exposed to light, this thread sparkles and shimmers perfect for hand and machine appliqué, embroidery, quilting, and topstitching. The colors are VERY hard to get pictured for you. The center shinny strip is the color that is the most accurate representation of the color.
